

# MOBILE SANITARY SYSTEMS

# THANK YOU FOR OVER 40 SUCCESSFUL YEARS

Since our foundation in 1982 by Peter Fliegenschmidt, we have established ourselves as one of the leading manufacturers in the international market of mobile sanitary systems. Our focus is on in-house production of the entire product range to flexibly meet individual customer requirements, react quickly to current trends in the market, or set new trends ourselves.

With our sanitary systems, we facilitate almost the whole world and deliver to customers spread all over the globe. Commercial agencies in Great Britain, Scandinavia and West Africa support us to guarantee the best service to every customer, even if we are not on-site.

We thank you for your confidence and support in this way and we are looking forward to furthering our successful cooperation.

## COMPETENCE IN PLASTICS AND TRAILER CONSTRUCTION

Through our core business, the production and sale of plastic toilets, we have developed into an efficient producer of plastic parts. We manufacture all parts for our toilets using rotary or deep-drawing processes before we finally assemble them into a quality-tested product. The molds required for this are developed and manufactured in our in-house toolmaking shop.

In our second focus area, vehicle construction, we concentrate on manufacturing disposal units, transport trailers and, since 2012, toilet trailers. To take over the entire production chain ourselves, we opened our branch in Döbeln in 2018. Here, in addition to the toilet trailers, we manufacture the required Sandwich panels.

## YOUR ADVANTAGES

As a customer, you purchase from us directly from the German manufacturer, eliminating the need for additional distribution channels. Since we manufacture almost all products and parts, we can respond individually to your requirements. We are also happy to implement unusual projects with you. We accompany you throughout the entire process: planning, consulting, production, delivery and a professional after-sales service.

Quality "made in Germany".

# MODERN PRODUCTION USING THERMOFORMING

## CUTTING-EDGE TECHNOLOGY

We use state-of-the-art equipment from Geiss and COMI in our thermoforming production lines, leading to cost-efficient production of large-area plastic parts, high quality and increased throughput so that production peaks can also be better absorbed.

## LIGHTWEIGHT MATERIAL

We use HDPE (High-Density Polyethylene) as the primary material for production. Due to its product properties, such as high stability and tear resistance, HDPE enables us to realize very thin Wall thicknesses, leading to weight savings and, for example, lower transport costs.

## HIGH DURABILITY

The HDPE components produced for our portable toilets are highly resistant to acids, alkalis and other chemicals such as cleaning agents, which makes cleaning the surfaces very straightforward.

## SUSTAINABILITY

With our large solar system on the production hall, we produce our own electricity, and we recycle 100 percent of all clean production residues into new raw material in our new shredder plant.

**We produce with  
solar energy!**

### FULLY AUTOMATIC COMI TWIN SHEET LINE

## GLO:BLUE IN A SACHET FOR EASY DOSING

- 01** ADVANCED ODOR CONTROL FORMULA  
for extreme heat and use conditions
- 02** HELPS TO BREAK DOWN  
paper and waste, making it easier to empty the  
tank
- 03** EASY TO USE  
Simply add one sachet to the tank with water
- 04** AVAILABLE SCENTS  
Bubble Gum, Hot Cherry, Red Berry

Easy-to-use dosing and advanced odor control formula. The sachets have a pleasant and long-lasting scent. They support the decomposition of paper and waste. They make it easier to empty the tank. For extreme heat and heavy use.

### INSTRUCTIONS FOR USE

Pour 20 liters of water into an empty and clean tank and add 1 sachet. The toilet should be serviced at least once a week.

### CONSTITUENTS

2-Bromo-2-nitropropane-1,3-diol; anionic surfactant <5 %; fragrance (2-methoxy-4-prop-2-enylphenol, benzyl cinnamate); colorant

### PACKAGING

1 bag = 80 sachets

1 box = 3 bags = 240 sachets
